REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The cited reference does not teach all the limitation in the claims. Patton teaches a device for delivering aerosolized medicaments. However, Patton does not teach an inhalation system and a method for the pulmonary delivery comprising a stabilized respiratory dispersion comprising a plurality of perforated microstructures suspended in and substantially permeated by a fluorochemical continuous phase. Patton further does not teach the volume of suspension medium displaced by the perforated microstructure is less than 70% of the average particle volume of the perforated microstructure, in order to provide a method and system for nebulization. Dellamary teaches stabilized preparations for use in metered dose inhaler. However, Dellamary does not qualify as a prior art because of the publication date is after the effective filing date of this application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 2, 6-12, 39 and 43-55 are allowed.
